***Summary Risk Indicator**

This information is for financial advisers only and should not be presented to, or relied upon by, private investors.

Important information: This information should be read in conjunction with the relevant Brochures and where appropriate, Key Information Documents (KIDs), which contain detailed information about each Plan and their risks and potential benefits. Information contained in this document does not constitute tax, legal or investment advice.

Investment Return

If the Closing Level of the Index on any Measurement Date before the Final Measurement Date is at least equal to its Opening Level the Plan will kick out, i.e. mature early, and make a gross investment return of 7.50% of the money you invest for each year that the Plan has been in force. The first Measurement Date will be on 18 May 2022, one year after the Start Date.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Opening Level, the Plan will provide an investment return at the Maturity Date equal to 45% of the money you invest. If the Final Level of the Index is below its Opening Level, no investment return will be payable at the Maturity Date.

Repayment of Capital

You will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of your money that you would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances you could lose all of your money. If the Final Level of the Index is at least equal to 65% of its Opening Level you will get back the amount you invested.

Investment Return

If the Closing Level of the Index on any Measurement Date before the Final Measurement Date is at least equal to its Opening Level the Plan will kick out, i.e. mature early, and make a gross investment return of 7% of the money you invest for each year that the Plan has been in force. The first Measurement Date will be on 18 May 2022, one year after the Start Date.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Opening Level, the Plan will provide an investment return at the Maturity Date equal to 42% of the money you invest. If the Final Level of the Index is below its Opening Level, no investment return will be payable at the Maturity Date.

Repayment of Capital

You will lose money if the Final Level of the Index is below 60% of its Opening Level. The amount of your money that you would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances you could lose all of your money. If the Final Level of the Index is at least equal to 60% of its Opening Level you will get back the amount you invested.

Investment Return

If the Closing Level of the Index on any Measurement Date before the Final Measurement Date is at least equal to its Reference Level the Plan will kick out, i.e. mature early, and make a gross investment return of 5.75% of the money you invest for each year that the Plan has been in force. The first Measurement Date will be on 19 May 2023, two years after the Start Date.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Reference Level, the Plan will provide an investment return at the Maturity Date equal to 34.50% of the money you invest. If the Final Level of the Index is below its Reference Level, no investment return will be payable at the Maturity Date.

The Reference Levels are as follows: Measurement Date 1: 100%, Measurement Date 2: 100%, Measurement Date 3: 95%, Measurement Date 4: 90% and Measurement Date 5: 85%

Repayment of Capital

You will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of your money that you would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances you could lose all of your money. If the Final Level of the Index is at least equal to 65% of its Opening Level you will get back the amount you invested.

Investment Return

If the Closing Level of the Index on 30 May 2023 or any subsequent Business Day before the Final Measurement Date is at least 5% above its Opening Level the Plan will kick out, i.e. mature early, and make a gross investment return based on how long the Plan has been in force.

The investment return will equal the number of days since the Start Date divided by 365 and multiplied by 7%.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least 5% above its Opening Level, the Plan will provide an investment return at the Maturity Date equal to 49% of the money you invest. If the Final Level of the Index is not at least 5% above its Opening Level, no investment return will be payable at the Maturity Date.

Repayment of Capital

An investor will lose money if the Final Level of the Index is below 65% of its Opening Level and the amount of their money that they would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances they could lose all of their money. If the Final Level of the Index is at least equal to 65% of its Opening Level an investor will get back the amount they invested.

Investment Return

If the Closing Level of the Index on any Quarterly Measurement Date before the Final Measurement Date is at least equal to its Opening Level the Plan will kick out, i.e. mature early, and make a gross investment return of 1.50% of the money you invest for each quarter that the Plan has been in force. The first Quarterly Measurement Date will be on 13 June 2022, one year after the Start Date.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Opening Level, the Plan will provide an investment return at the Maturity Date equal to 30% of the money you invest. If the Final Level of the Index is below its Opening Level, no investment return will be payable at the Maturity Date.

Repayment of Capital

You will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of your money that you would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances you could lose all of your money. If the Final Level of the Index is at least equal to 65% of its Opening Level you will get back the amount you invested.

Investment Return

If the Closing Levels of both Indices on any Measurement Date before the Final Measurement Date are at least equal to their respective Reference Levels, the Plan will kick out, i.e. mature early, and make a gross investment return of 7% of the money you invest for each year that the Plan has been in force. The first Measurement Date will be on 30 May 2022, one year after the Start Date.

If the Plan has not matured early, and the Closing Levels of both Indices on the Final Measurement Date (the 'Final Levels') are at least equal to their respective Reference Levels, the Plan will provide an investment return at the Maturity Date equal to 49% of the money you invested. If the Final Level of one or both Indices is below its Reference Level, no investment return will be payable at the Maturity Date.

The Reference Levels are as follows: Measurement Date 1: 105%, Measurement Date 2: 100%, Measurement Date 3: 100%, Measurement Date 4: 100%, Measurement Date 5: 95%, Measurement Date 6: 90% and Measurement Date 7: 85%.

Repayment of Capital

You will lose money if the Final Level of the lower performing Index is below 65% of its Opening Level. The amount of your money that you would lose will be the percentage by which the Final Level of that Index is below its Opening Level. In extreme circumstances you could lose all of your money. If the Final Level of the lower performing Index is at least equal to 65% of its Opening Level you will get back the amount you invested.

Income

If the Closing Level of the Index on any Quarterly Measurement Date is at least equal to 80% of its Opening Level, the Plan will pay a gross income of 1.25% for that quarter. No income will be payable for a quarter if the Closing Level of the Index is below 80% of its Opening Level on the Quarterly Measurement Date.

The first Quarterly Measurement Date will be on 19 August 2021, three months after the Start Date. Thereafter, the performance of the Index will be measured quarterly. If the kick-out condition is met (see below), income will be paid in respect of that quarter and the Plan will mature early. No further income payments will then be payable.

Kick-out Condition

From year 2, the Plan will kick-out, i.e. mature early, if the Closing Level of the Index is at least 5% above its Opening Level on any Quarterly Measurement Date. In this event you would receive a full return of your money, as well as the income due for that quarter. The first Quarterly Measurement Date on which an early maturity could be triggered will be on 19 May 2023, two years after the Start Date.

Repayment of Capital

You will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of your money that you would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances you could lose all of your money. If the Final Level of the Index is at least equal to 65% of its Opening Level you will get back the amount you invested.
