

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	6-Year Structured Deposit linked to the EURO STOXX 50® Index (Price EUR) and the FTSE 100 Index
Product identifier	Identifier Reference: GS00SD000318
Product manufacturer	Goldman Sachs International Bank, London, UK (see http://www.gspriips.eu or call +442070510101 for more information)
Competent Authority	Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and Prudential Regulation Authority, United Kingdom
Date of this document	May 3, 2018 16:17 London local time

What is this product?

Type The product is in the form of a deposit provided under English law. It is an interest bearing security, but your interest is not guaranteed. The payment obligations of the product manufacturer are not guaranteed by any entity.

Objectives The product pays interest that is linked to the performance of the underlying assets (as defined below). What you will receive at the end of the term of the product is not certain and will depend on the performance of the EURO STOXX 50® Index (Price EUR) and the FTSE 100 Index (the **underlying assets**). The product has a fixed term, ending on June 17, 2024. The product is not listed on an exchange.

Interest: If the closing price of each underlying asset on an interest observation date is at or above its respective Initial reference price multiplied by the Coupon Level, you will receive the Interest payment multiplied by the deposit amount on the corresponding interest payment date. The Coupon Level is defined as 95%.

Repayment at maturity:

On June 17, 2024, you will receive the deposit amount.

The deposit amount is, at any time, the amount standing to the credit of your deposit account at such time, and excludes any amount already withdrawn or transferred. The initial reference prices are shown below.

<i>Underlying asset</i>	<i>Initial reference price</i>
EURO STOXX 50® Index (Price EUR)	EUR TBD
FTSE 100 Index	GBP TBD

The initial reference price of an underlying asset is the closing price of such asset on June 8, 2018.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the

product may be terminated early. These events are specified in the product terms and principally relate to the underlying, the product and the product manufacturer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above.

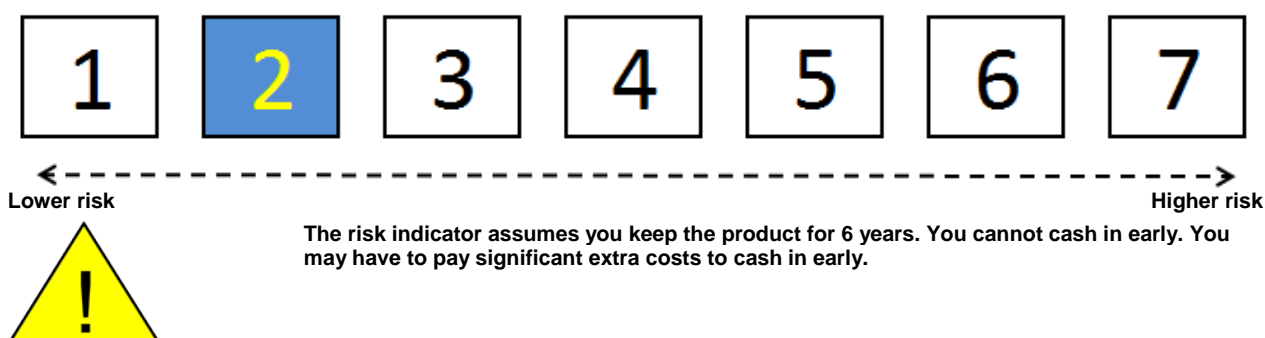

Intended retail investor

The product is intended to be offered to retail investors who:

1. have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, with experience of investing in and/or holding a number of similar products providing a similar market exposure;
2. seek income, principal protection, subject to the issuer's ability to pay, expect the movement in the underlying to perform in a way that generates a favourable return, have an investment horizon of the recommended holding period specified below;
3. accept the risk that the issuer could fail to pay or perform its obligations under the product but otherwise are not able to bear any loss of their investment;
4. are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below; and
5. are making use of professional advice.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class. This takes into account two elements: (1) the market risk - that the potential losses for future performance are rated at a low level; and (2) the credit risk - that poor market conditions are deemed very unlikely to impact our capacity to pay you. You are entitled to receive back at least 100.00% of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before June 17, 2024.

Performance scenarios

Investment: GBP 10,000				
Scenarios		1 year	4 years	6 years (Recommended holding period)
Stress scenario	What you might get back after costs	GBP 7,458.00	GBP 8,522.16	GBP 10,000.00
	Average return each year	-25.32%	-3.92%	0.00%
Unfavourable scenario	What you might get back after costs	GBP 7,844.60	GBP 8,748.96	GBP 10,000.00
	Average return each year	-21.46%	-3.29%	0.00%
Moderate scenario	What you might get back after costs	GBP 9,669.23	GBP 10,992.22	GBP 12,150.00
	Average return each year	-3.29%	2.39%	3.29%
Favourable scenario	What you might get back after costs	GBP 10,457.50	GBP 11,566.33	GBP 12,580.00
	Average return each year	4.55%	3.70%	3.89%

This table shows the money you could get back over the next 6 years under different scenarios, assuming that you invest GBP 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. In addition, you should note that the results shown for the intermediate holding periods do not reflect estimates of the product's future value. You should therefore not base your investment decision on the results shown for these interim holding periods.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Goldman Sachs International Bank is unable to pay out?

The product is potentially covered by the UK Financial Services Compensation Scheme (FSCS). This protection will depend on various factors and there

are limits to the amount of compensation the FSCS will pay.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest GBP 10,000. The figures are estimates and may change in the future.

Costs over time The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment: GBP 10,000

Scenarios	If you cash in after 1 year	If you cash in after 4 years	If you cash in at the end of the recommended holding period
Total costs	GBP 568.23	GBP 730.23	GBP 390.42
Impact on return (RIY) per year	5.66%	1.66%	0.54%

The costs shown in the table above represent how much the expected costs of the product would affect your return, assuming the product performs in line with the moderate performance scenario. Disregarding the impact on your return in that scenario, the estimated entry and exit costs as a percentage of the deposit amount are estimated to be 5.60% if you cash in after 1 year, 6.77% if you cash in after 4 years and 3.11% if you cash in after the recommended holding period.

Composition of costs The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

The table shows the impact on return per year.

One-off costs	Entry costs	0.54%	The impact of the costs already included in the price. This includes the costs of distribution of your product.
	Exit costs	0.00%	Not applicable.

The costs shown in the table above represent the split of the reduction in yield shown in the costs over time table at the end of the recommended holding period. The split of the actual estimated costs of the product is estimated to be as follows: entry costs: 3.11%, exit costs: 0.00%.

How long should I hold it and can I take money out early?

Recommended holding period: 6 years

You have the right to cancel your investment before June 8, 2018. The recommended holding period for the product is 6 years as the product is designed to be held until maturity; however the product may terminate early due to a change in law event. You have no contractual right to terminate the product prior to maturity.

How can I complain?

Any complaint regarding the person advising on or selling the product (such as your intermediary) can be submitted directly to that person. Complaints about the product and/or the conduct of the product manufacturer may be lodged in accordance with the steps set out at <http://www.gspriips.eu>. Complaints may also be addressed in writing to Goldman Sachs International, PRIIP KID - Compliance Securities, Peterborough Court, 133 Fleet Street, London, EC4A 2BB, United Kingdom or may be sent by email to gs-eq-priip-kid-compliance@gs.com.

Other relevant information

Any additional documentation in relation to the product, in particular the product terms are available free of charge from the product manufacturer upon request.
