Investment Return

If the Closing Level of the Index on any Measurement Date before the Final Measurement Date is at least equal to its Opening Level the Plan will kick out, i.e. mature early, and make a gross investment return of 10.50% of the money invested for each year that the Plan has been in force. The first Measurement Date will be on 14 July 2023, one year after the Start Date.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Opening Level, the Plan will provide an investment return at the Maturity Date equal to 73.50% of the money invested. If the Final Level of the Index is below its Opening Level, no investment return will be payable at the Maturity Date.

Repayment of Capital

An investor will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of money that they would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances an investor could lose all of their money. If the Final Level of the Index is at least equal to 65% of its Opening Level an investor will get back the amount invested.

Investment Return

If the Closing Level of the Index on any Quarterly Measurement Date before the Final Measurement Date is at least equal to its Reference Level, the Plan will kick out, i.e. mature early, and make a gross investment return for each quarter that the Plan has been in force.

The first Quarterly Measurement Date will be on 12 June 2023, one year after the Start Date. In the event an early maturity is triggered at this point the investment return payable will be 6.50%. The potential investment return will then increase by 1.625% for each subsequent quarter.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Reference Level, the Plan will provide an investment return at the Maturity Date equal to 32.50% of the money invested. If the Final Level of the Index is below its Reference Level, no investment return will be payable at the Maturity Date.

The Reference Levels are as follows: Quarterly Measurement Dates 1 – 4 inclusive: 105%, Quarterly Measurement Dates 5 – 8 inclusive: 100%, Quarterly Measurement Dates 9 - 12 inclusive: 95%, Quarterly Measurement Dates 13 - 16 inclusive: 90%, Final Measurement Date: 85%.

Repayment of Capital

An investor will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of money that they would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances an investor could lose all of their money. If the Final Level of the Index is at least equal to 65% of its Opening Level an investor will get back the amount invested.

Investment Return

If the Closing Level of the Index on any Measurement Date before the Final Measurement Date is at least equal to its Opening Level the Plan will kick out, i.e. mature early, and make a gross investment return for each half year that the Plan has been in force.

The first Measurement Date will be on 24 June 2024, two years after the Start Date. In the event an early maturity is triggered at this point the investment return payable will be 16.50%. The potential investment return will then increase by 4.125% for each subsequent half year.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Opening Level, the Plan will provide an investment return at the Maturity Date equal to 41.25% of the money invested. If the Final Level of the Index is below its Opening Level, no investment return will be payable at the Maturity Date.

Repayment of Capital

An investor will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of money that they would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances an investor could lose all of their money. If the Final Level of the Index is at least equal to 65% of its Opening Level an investor will get back the amount invested.

Investment objective	Growth

Investment Return

If the Closing Level of the Index on any Measurement Date before the Final Measurement Date is at least equal to its Reference Level the Plan will kick out, i.e. mature early, and make a gross investment return of 7.35% of the money invested for each year that the Plan has been in force. The first Measurement Date will be on 9 June 2023, one year after the Start Date.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Reference Level, the Plan will provide an investment return at the Maturity Date equal to 58.80% of the money invested. If the Final Level of the Index is below its Reference Level, no investment return will be payable at the Maturity Date.

The Reference Levels are as follows: Measurement Date 1: 105%, Measurement Date 2: 100%, Measurement Date 3: 100%, Measurement Date 4: 100%, Measurement Date 5: 95%, Measurement Date 6: 95%, Measurement Date 7: 90% and Measurement Date 8: 85%.

Repayment of Capital

An investor will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of money that they would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances an investor could lose all of their money. If the Final Level of the Index is at least equal to 65% of its Opening Level an investor will get back the amount invested.

Summary Risk Indicator	5
Time horizon	Long term (5+ years)
Investment objective	Growth

Investment Return

If the Closing Levels of both Indices on any Measurement Date before the Final Measurement Date are at least equal to their respective Opening Levels, the Plan will kick out, i.e. mature early, and make a gross investment return of 12% of the money invested for each year that the Plan has been in force. The first Measurement Date will be on 14 July 2023, one year after the Start Date.

If the Plan has not matured early, and the Closing Levels of both Indices on the Final Measurement Date (the 'Final Levels') are at least equal to their respective Opening Levels, the Plan will provide an investment return at the Maturity Date equal to 84% of the money invested. If the Final Level of one or both Indices is below its Opening Level, no investment return will be payable at the Maturity Date.

Repayment of Capital

An investor will lose money if the Final Level of the lower performing Index is below 65% of its Opening Level. The amount of money that they would lose will be the percentage by which the Final Level of that Index is below its Opening Level. In extreme circumstances an investor could lose all of their money. If the Final Level of the lower performing Index is at least equal to 65% of its Opening Level an investor will get back the amount invested.

Income

If the Closing Level of the Index on any Quarterly Measurement Date is at least equal to 85% of its Opening Level, the Plan will pay a gross income of 2.10% for that quarter. No income will be payable for a quarter if the Closing Level of the Index is below 85% of its Opening Level on the Quarterly Measurement Date.

The first Quarterly Measurement Date will be on 29 September 2022, three months after the Start Date. Thereafter, the performance of the Index will be measured quarterly. If the kick-out condition is met (see below), income will be paid in respect of that quarter and the Plan will mature early. No further income payments will then be payable.

Kick-out Condition

From year 2, the Plan will kick-out, i.e. mature early, if the Closing Level of the Index is at least equal to its Opening Level on any Quarterly Measurement Date. In this event an investor would receive a full return of their money, as well as the income due for that quarter. The first Quarterly Measurement Date on which an early maturity could be triggered will be on 1 July 2024, two years after the Start Date.

Repayment of Capital

An investor will lose money if the Final Level of the Index is below 65% of its Opening Level. The amount of money that an investor would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances an investor could lose all of their money. If the Final Level of the Index is at least equal to 65% of its Opening Level an investor will get back the amount invested.
